INTRODUCTION

The joint assurance map is a means of gathering evidence from across the entire organisation for objective examination, for the purpose of providing an independent assessment on governance, risk management and control processes for the organisation. The assurance map is based on the 'three lines of defence' approach and is suitably comprehensive to help identify gaps in assurance needs that are vital to the organisation, and to facilitate escalation of risk and control issues requiring visibility and attention by senior management, by providing a comprehensive view of assurance across the risk environment. In addition to internal assurances, there are external agencies such as Internal and External Auditors as well as Her Majesty's Inspectorate of Constabulary and Fire and Rescue Services (HMICFRS) that work with the force and the Office of the Police and Crime Commissioner (OPCC) to ensure that the risk management process is effective and robust.

FINANCE

Financial Management

Financial management for the force (including insurance and treasury management) is a core function delivered through a shared team consisting of G4S (via the Strategic partnership contract), force and OPCC staff. As distinct corporations sole the OPCC and Force each have a Chief Financial Officer (CFO) and a shared Deputy Chief finance Officer (DCFO). The day-to-day financial management of the force is primarily delivered via the strategic contract with G4S. Budget monitoring takes place monthly and is reported to Resource Governance meetings.

Budget & Government Funding

This section of the assurance map covers the activities involved in preparing and managing the budget for policing in Lincolnshire. This incorporates the various funding streams including; council tax and central government grant via the funding formula which determines the levels of funding received by all 43 forces in England and Wales.

Procurement

Procurement is one of the key functions managed by G4S within the Strategic Partnership contract. It encompasses all the procurement activity conducted by the organisation (acquiring goods, services and work from external suppliers) and the ongoing management of supplier contracts. An annual procurement plan sets out how best value will be achieved and progress against the plan is monitored through resources governance meetings. Significant procurement details are published on the PCC website via the Commissioner's 'decision notice' process.

OPERATIONS

The Operations section of the assurance map encompasses those elements of the force involved directly in operational policing activity.

Local Policing (East & West Areas)

This section of the assurance map covers operational policing focussed at a local level in the county's neighbourhoods. Local policing is divided into two major geographical areas, east and west. Each headed by a chief superintendent. Each area is further split into council district areas, with each one being led by an inspector. These districts are further divided into neighbourhood policing areas. There are 58 areas in total. Each team consists of a community beat sergeant, community beat constable and PCSOs who are dedicated to policing a specific local area.

Crime

The crime section of the Assurance map covers those aspects of operational / frontline policing across a very broad spectrum of work, including specialist teams of officers and staff involved in crime prevention, protecting the public and investigating crimes. Examples include, Emerald team (serious sexual offences), MOSOVO, (Management of Sexual or Violent Offenders), Online investigation team, Missing persons, Domestic abuse, child sexual exploitation, Modern slavery, Serious and organised Crime, safeguarding, victims services.

Force Control Room (FCR)

This section of the assurance map covers the activities of the Force Control Room which operates on a 24/7 basis and is provided within the strategic partnership contract with G4S. It is primarily the first point of contact for members of the public, receiving an average of 25,000-30,000 101 calls and 7,000-8,000 999 calls per month. It consists of frontline officers and support staff which make up a Police National Computer bureau, Intelligence Support Desk and the Incident Resolution Team and Call-takers and Controllers who manage incoming calls and co-ordinate an appropriate response. They interrogate the systems available to them to ensure the safety of officers, and that each incident is concluded to a satisfactory level and in compliance with the National Crime Recording Standards (NCRS).

Custody

This section of the assurance map covers the activities of the custody provision which operates on a 24/7 basis and is provided within the strategic partnership contract with G4S who provide the custody staff. Police officers (custody Sgts) are legally required to manage and control the detention of detainees. The force operates 4 custody suites sited in

Grantham, Lincoln, Skegness and Boston. The management of custody is through a regional collaboration via EMCJS with Lincolnshire and Nottinghamshire forming the northern regional Hub. The custody sites are monitored under the Independent Custody Visiting Scheme (ICVS) to help ensure appropriate treatment of, and conditions for detainees.

SUPPORT

ICT & Information Management

This section of the assurance map covers the activities of the ICT department (Computer hardware, software, telephony and technical support) and the Information Management Unit (Data control and management), including vetting and security units. The IMU control data within the statutory requirements that relate specifically to police information (including its retention and deletion) and the more general data protection regulations. Both the ICT and IMU are provided within the strategic partnership contract with G4S.

Estates and Fleet

This section of the assurance map covers the activities of the fleet vehicle department and the policing Estate. Both of these functions are provided within the Strategic partnership with G4S. In each case the service delivered covers the provision, management, development and maintenance of fleet and estate assets. This encompasses working with partner organisations eg co-located services such as the planned tri-service operational station in Lincoln housing police, fire, and ambulance services.

Human Resources inc learning & development

This section of the assurance map covers the activities of the Human resource and Learning & development departments and is provided within the strategic partnership contract with G4S. This covers the recruitment, development and management of human resources (officers and Staff) plus their training and development needs. This is co-ordinated with national policing regulations and requirements for officer training.

Commercial Partnership (contract management)

This section of the assurance map covers the activities of the commercial partnership team (CPT) who manage the contractual relationship with the strategic partner G4S, including performance monitoring and management of the commercial contract and service delivery. Please note: the contract covers operational support in the; Force Control Room, Crime Management Bureau, Firearms Licensing, Town Enquiry Offices, Custody, Identification Unit plus back-office support for Criminal Justice Services, Information Technology, Finance & Procurement, Learning & Development, Human Resources & Resource Management Unit, and Integrated Services for Support Services, Fleet, Assets & Facilities

Collaborations

This section of the assurance map covers the formal collaborations entered into by the force. These are a variety of services delivered by multi force collaborations from across the five east midlands forces.(not all collaborations involve all five forces). The services delivered collaboratively involving Lincolnshire include:: Forensic services (EMSOU – FS), Operational support (EMOpSS) which incorporates specialist armed and roads policing, Legal services, Occupational health, East Midlands Criminal Justice Service(EMCJS) and the East Midlands Special Operations Unit (EMSOU)which incorporates the investigation of, Major Crime, and Serious and organised crime. These are established under formal 'Section 22' agreements which lay out the legal terms of each collaboration.

Organisational support

This section of the assurance map covers the activities of the departments involved in supporting the organisation in facilitating change and development activity, this includes strategic development, continuous improvement and project & programme management functions of the force. These functions are provided by a mix of retained support staff and operational officers. (Work covered includes the development of strategy, delivery plans, policy, formal project & programme management, benefits realisation monitoring, change management

RISK SUMMARY & CONTROL											
The risks in this area of business relate to contractual issues and achievement of agreed objectives within The general contract (SDA) as applied across all areas of service delivery and the scheduled review of the SDA leading up to the end of the contract period. The 'objectives' risk profile is reducing as the likelihood of objectives not being reached diminishes as the contract period shortens.
