

April 2020

Value for Money & Efficiency Plan 2020/21

Police and Crime Commissioner for Lincolnshire

Chief Constable, Lincolnshire Police

1. Background

- 1.1 The Police and Crime Commissioner and the Chief Constable both have a statutory duty to make the best use of the resources available to them. The majority of the income for police and crime services comes from local and national taxpayers. The PCC and Chief Constable need to be able to demonstrate to the residents of Lincolnshire and to central government that the funding received is being used to the best possible effect.
- 1.2 Central government grants provide roughly half the service's income and the grant which Lincolnshire receives is well below the national average. This was acknowledged in the Home Office Core Grant Distribution Review, which considered potential changes to the police funding formula. The funding formula was to be considered as part of the Comprehensive Spending Review 2020, however, since the onset of the coronavirus pandemic, it is looking increasingly likely that the spending review will be postponed. This means that Lincolnshire Police will continue to face the challenge of delivering services with a lower level of funding than comparable forces for at least the next two financial years.
- 1.3 Lincolnshire Police ranked lowest for total resource funding of all forces in England and Wales in 2019/20, a situation which continues in 2020/21. This has required the force to be both innovative and collaborative in its approach to providing policing services. The force has increased cost effectiveness by outsourcing a considerable part of its back office functions to the private sector, and working collaboratively within the East Midlands forces to provide specialist capabilities. The force has reviewed its policing model to ensure it can deliver core policing services within the funding envelope but responding to increasing demand and new emerging areas of threat and crime whilst continuing to provide neighbourhood policing and maintaining visibility, will become increasingly difficult.
- 1.4 Lincolnshire Police, like most other public bodies, has had to make substantial savings over the first austerity period. The reduction in funding, which exceeds 20% since 2011, presents a continuing challenge in that significant savings have already been achieved to balance the budget through outsourcing and collaboration. This reduces the options available to the force for finding further savings without considering reductions to the workforce and hence impacting adversely on frontline policing services.
- 1.5 Despite this, the force performs well against other forces in its most similar group and other forces in England and Wales in relation to outcomes in all areas of crime, relative to its size both nationally and within the most similar group. This demonstrates the effectiveness of the force's collaborative arrangements and previous efficiency measures.

- 1.6 HMICFRS have provided a detailed set of VFM profiles based on the Police Objective Analysis. Lincolnshire spends the lowest amount per head of population across all 43 Forces; this means that in the majority of indicators, Lincolnshire is in the lowest quartile of spend.
- 1.7 In order to balance the budget in 2019/20 and beyond, workforce reductions were necessary including reducing the police officer numbers to 1,020 FTE. This represents an unprecedented low level of police officer numbers to cover one of the largest geographical force areas in England. Maintaining adequate levels of service and reduced operational resilience were the main risks. The announcement of the National Police Uplift Programme during 2019/20 went some way to alleviating these concerns. The first tranche allocation for Lincolnshire Police was 50 FTE, which whilst welcome, does not restore the force to the original workforce strength prior to the savings programme reductions and so does not alleviate the risks in full. Tranche 2 and 3 are expected to be circa 120 FTE bringing the force back to numbers last seen in 2011, before the austerity cuts.
- 1.8 Whilst the uplift and associated funding allocation will restore police officer numbers to an operationally acceptable level, it will not address the underlying budget deficit which remains due to the historic grant funding allocation methodology.
- 1.9 The budget for Lincolnshire Police will therefore still have to be managed rigorously in 2020/21, given that the funding formula review is likely to be delayed still further from the expected implementation date of 2021/22. Lincolnshire Police have taken the prudent approach of assuming no additional income from the funding formula review and is formulating its plans accordingly.

2. Current Performance

- 2.1 A summary of Lincolnshire's performance compared with its Most Similar Group (MSG) forces is shown in the table below. This is taken from the HMICFRS value for money profiles.

PERFORMANCE OR COST INDICATOR	LINCS	MSG	LINCS DIFFERENCE
Police Officers per 1,000 population - Est. 2019/20	1.45	1.77	(0.32)
PCSOs per 1,000 population - Est. 2019/20	0.16	0.17	(0.01)
Expenditure per head of population / per day - Est. 2019/20	45p	53p	(8p)
Recorded Crime per 1,000 population - 2018/19	69.95	69.05	0.9
Crimes per visible officer - 2018/19	83.66	69.73	13.93
Charged/Summonsed per visible officer - 2018/19	9.04	7.12	1.92
Victim Overall User Satisfaction % (12 month average as at March 2020)	75.55%		

3. Financial Strategy

3.1 The Commissioner's Financial Strategy requires Value for Money to be a key consideration in decision making. This includes:

- Having robust business plans linking policing plans with the resources available.
- Applying a rigorous business case process for all major projects involving new revenue or capital spending. All business cases must include the Chief Finance Officer's approval of financial implications and compliance, and assessment of risk and value for money. Benefits realisation and improved service efficiency will need to be clearly demonstrated for all new investment.
- Adopting a priority based approach to budgeting and reviewing all areas of resource allocation periodically through a planned programme of value for money reviews.

3.2 Services will continue to be delivered in partnership with other bodies where this can demonstrate better value for money including improved service efficiency and/or lower costs. This may include:

- Working collaboratively with partners, particularly other police forces in the region
- commissioning services from other bodies
- contracting out services to private sector providers

4. Priorities for 2020/21

4.1 The main emphasis of work in 2020/21 will be on:

- **Managing the workforce numbers to balance the planned reductions and subsequent uplift for 2020/21.**
Planned cumulative savings of over £26 million have been delivered successfully over the last six years. There are limited opportunities for the achievement of further savings without adverse impact on service delivery. The budget for 2020/21 identified £3.4m of savings from the outset mainly from workforce reductions but the national uplift brings a subsequent increase in workforce numbers. Careful management will be required to ensure that the numbers are delivered within the uplift funding allocation.
- Securing the transformational improvement being delivered through the **strategic partner arrangement** with G4S who provide the majority of back office, control room and some criminal justice services. A key part of the partnership agreement

is that, in addition to providing financial savings, G4S will improve services significantly by transforming the way they are delivered. The savings plan includes target savings of £1m from the contract value from 21/22 onwards and a key priority will be to work with G4S to secure the savings whilst protecting service delivery.

- Developing and implementing the projects and work streams under the change programme. The force has published its strategic plan “**Distinctively Lincolnshire**” and the Change Board oversees the programme of change required to deliver the additional capabilities outlined within the strategic plan.
- Ensuring that the expected benefits are realised in practice and that cash savings targets are delivered will also be a key feature of the programme.

5. Value for Money & Efficiency focus 2020/21

- 5.1 **Agile Working** has been a key project in the continuing theme of enabling better use of both officer time and the force’s estate, alongside the Mobile Data project. This involved replacing desktop IT with laptops and tablets, allowing staff to work remotely where this enables greater efficiency. The next stage will be the implementation of **Microsoft Office 365** with its additional functionality which will enable team working remotely. The investment in Office 365 has been built into the Medium Term Financial Plan from 2020/21 onwards.
- 5.2 The **Book On Book Off (BOBO)** project was designed to utilise the force’s Duty Management System to reduce the cost of overtime accrued by police officers and streamline the process of approval, saving approximately 80 hours of manual input per month processing requests for overtime and correcting assumed duties to actual times worked. This was largely completed in 2019/20 but the final stage is linkage into the new Command & Control system (see below) which will be completed in 2020/21.
- 5.3 **Command & Control** – the force evaluated and commissioned the replacement of the existing command & control system in 2018/19. The project will continue to completion in 2019/20. The force is investing in one of the market leading systems which will facilitate better analysis of demand, improved prioritisation and more efficient deployment of officers and resources. This represents a significant capital investment but with significant expected benefits realisation. The replacement system will also be compatible with the Emergency Services Mobile Communications Programme (ESMCP); see below.

A summary of the expected benefits is shown below.

Local Policing

- Tackling anti-social behaviour using geo fencing capabilities for known areas of repeated offences,
- Support for proactive preventative activities such as patrol route scheduling and tracking,
- Identification of individuals that cause reoccurring problems and crime,
- Identification of vulnerable individuals and deployment of appropriate resources,
- Improved multi agency communications and accountability hand over,
- Improved data sharing, data integration, data analytics and forecasting to better deploy and position local policing resources.

Specialist Capabilities

- By changing the way Lincolnshire interacts with their communities and staff will provide an opportunity to enhance and focus on reviewing our model for service delivery. A new system will provide an opportunity to streamline digital processes that may provide the ability to scale up specialist capabilities.
- The ability of a new system to consume significant amounts of information and present that to the user enables better identification of risk, with the ability to deploy and manage regional and volunteer resources throughout the county to maximise our opportunities to disrupt Organised Crime Groups, Terrorist threats and Cyber-crime.

Digital Policing

- A new system will deliver an agile and flexible operating system that can be scaled to manage increased demand but can also flex to manage joint mobile operating sites.
- The enhancements of a new system over the existing system will allow direct access to digital media for operational officer and managers to review 999 calls, CCTV footage and Drone deployments. This will enable commanders to assess the threat and risk in real time.
- A new system will provide multi media reporting into the force whilst maintain the traditional routes through telephone contact. Automated updates and messaging to relevant callers, witnesses and victims will increase confidence and improve satisfaction.
- Allow the force to pool all our legacy systems to allow the user to view all information held on the system.

- Based on pre-configured business rules the new application will provide suggestions on resource allocation and provide digital response plans securely within the application.

Distinctively Lincolnshire and PCC Police and Crime Plan

In addition to the benefits described above in alignment to the national strategy for future policing the new system is expected to deliver specific benefits aligned to local plans for Lincolnshire.

- The enhanced capabilities of a new system will enable Lincolnshire to better understand our demand and become more flexible about our use of resource to meet it. This will be achieved through the flexible configuration of the system to specifically identify patterns of reporting and utilise the flexibility of the reporting functionality to analyse that demand. This will reduce the time and effort required to scrutinise the data so we can react more effectively to changing circumstances and resolve them before they become an issue.
- The new system will allow for automated tasking and messaging reducing the time taken to update callers whilst recognising their history of contact any vulnerabilities. This will be achieved through the design of the application where present messages can be stored and a person's contact details are directly linked to the application and communications network to allow seamless interaction without the need to endlessly seek the caller's number.
- The force will be able to pre-plan its response based on policing demands ensuring an automated and swift response. The ability to geo fences an area and recognises linked calls from those specific locations. This ability will allow us to manage and respond to incidents such as hare coursing in a more effective and efficient manner.
- The capabilities of the application will enable the force to engage with its communities digitally, ensuring capture of contacts in a consistent and reusable fashion. This will be achieved through a contact management application which will have mandated fields for consistency and integrate with our existing telephone system providing the capabilities of communicating through web chat, e-mail or social media.
- The new system will enable the force to provide digital update to officers on matters of risk and harm in real time with the ability to track and capture their responses through standardised recording in a digital format. This will be achieved through the command mobile unit where officers will be alerted based on information held in our core RMS. The system will know where the officer is located through the system tracking software and can provide pictures, intelligence reports on an automated basis without the intervention of an operator. For example if an officer is on enquiries and is near to a wanted sex offender. The

system would alert the officer by message, provide a photo, provide the details of the arrest and provide the suspects address. Without this notification the officer may never have known they were in the vicinity of and wanted person.

- The solution will provide staff with an intuitive application that will assist and support them in their role. Providing a single picture of information and reducing double keying of data. This will be achieved through the integration with the regional Niche RMS platform. The Contact management system and the command and control system will push and pull data from our core system ensuring we reuse and update information in a connected fashion. This will provide officers a consistent single message without the need to multi search systems.
- The application will be integrated through core applications, providing a single book off book on process of resources with Crown DMS, an integrated mobile application through Pronto and reuse the data with our core records management system Niche.
- The application will sit on a more stable infrastructure and will be fully agile with the ability to run a command and control function from a laptop anywhere in the county.

5.4 **Emergency Services Mobile Communications Programme (ESMCP)**

– this is a national programme to replace the current Airwave communications network with a new Emergency Services Network (ESN). Significant savings are expected to be realised through the implementation as running costs for the new network are forecast to be half the current running costs. In order to be ready for the implementation, the force will need to replace some of its IT infrastructure in addition to purchasing the new mobile communication devices. Whilst there has been considerable slippage in the national programme timetable, The Force has continued to plan for ESN readiness. The replacement of the MDT's and the Command & Control system, both of which are programmed into the 2020/21 capital programme, have been designed for ESN compatibility.

5.5 **Demand Management Tool**

– provision has been made within the MTFP in 2020/21 for investment in a suitable demand management system which will enable a better understanding of demand, leading to more efficient allocation of resources. This will deliver live data to frontline officers via the MDT's which will in turn, facilitate decision making and more efficient resolution of situations.

5.6 **The Bluelight Collaboration Programme**

, which has created a shared Headquarters and Control Room for Police and Fire and Rescue, and a tri-service campus in the City of Lincoln for all three emergency services is now largely completed. However, the work to consider further opportunities for co-location and resulting efficiencies

will continue through our partnership working channels and the One Public Estate initiative.

5.7 **Energy Efficient investment in estate** - the force will continue to explore opportunities to access government-provided Salix loans to fund energy-efficient lighting and heating throughout the estate. Salix provides interest-free loans for investment in energy-efficient technology which reduces both energy usage (and hence provides revenue savings) and the organisation's carbon footprint. A Salix funded Solar PV scheme is included in the 2020/21 capital programme.

5.8 **Fleet** – considerable investment in the fleet has been planned for 2020/21 with a further £1.0m added to the capital programme to ensure that all vehicles meet the force's specification in terms of age and mileage. Furthermore, two projects were in progress in 2019/20 and will continue to completion in 2020/21.

- **Telematics** – the force commenced the implementation of telematics in the operational vehicle fleet in 2019/20 with planned completion in 2020/21. Early indications are that improvements in vehicle usage and efficiency have the potential to realise net savings of circa £150k per annum. However, the current situation in respect of the coronavirus pandemic will delay full completion, but this will be prioritised once the restrictions are lifted.
- **Fleet vehicle specifications** - procurement of fleet related products and services are directed by national and regional collaborative purchasing contracts which bring together the combined purchasing power of other police forces and emergency services. These contracts ensure maximum value for money is achieved. Lincolnshire Police will continue to support and actively promote these procurement initiatives. The current vehicle procurement route is via the West Midlands Vehicle Framework which is a national contract. The fleet requirement is reviewed annually, continually maximising the efficiency of the owned fleet. The force commenced a full review of the vehicle specifications, preferred suppliers and full lifecycle costs in 2018/19 to ensure that the force provides its officers with the appropriate vehicles and maximises cost efficiency. This work continued in 2019/20 for completion in 2020/21.

6. Management and Performance

- 6.1 Delivery of the Value for Money & Efficiency Plan is overseen by the Joint Internal Audit Committee and progress is reported regularly to the Chief Constable and the Police and Crime Commissioner through monthly budget monitoring reports.
- 6.2 Independent assessments of the delivery of value for money are also provided by the external auditor and by HM Inspectorate of Constabulary and Fire & Rescue Services (HMICFRS).
